The Federal Highway Administration (FHWA) of the U.S. Department of Transportation and the International Right of Way Association (IRWA) hereby establish this Partnering Agreement to promote greater coordination of efforts to improve the Nation's public infrastructure by providing a quality training system for our customers. Joint partnership activities will be centered on educational and training needs, training outreach, and proactive training activities. The FHWA and IRWA will work together to identify, develop, and provide quality training that will support the Department of Transportation's vision to create the best transportation system in the world, and strategic goals of Mobility, Safety, Productivity, Human and Natural Environment and National Security.

By this agreement, the FHWA and IRWA commit themselves to creating a training system to address FHWA's Strategic Plan that will provide a framework for ROW training necessary to assure that FHWA, State/Local and other Federal Agency personnel will have access to the best training system possible. We will embrace new and emerging technologies and capitalize on opportunities to improve training services today and in the future. The FHWA and IRWA, through joint activities, will assist our customers by providing quality training in ROW disciplines, delivered in a cost-effective manner that support ROW acquisition activities conducted under the requirements of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (the Uniform Act) as amended by the Uniform Relocation Act Amendments of 1987.

To meet these goals and objectives, the FHWA and IRWA will

- ▶ Cooperate in efforts to understand the training needs of FHWA, State/Local Public Agency and other Federal Agency personnel and how to best prepare them for the next century,
- ▶ Cooperate to educate our customers and the traveling public in the significance of infrastructure investment, the need to maintain this important national resource and its role in sustaining our quality of life, while assuring that all rights and

INTERNATIONAL RIGHT OF WAY ASSOCIATION

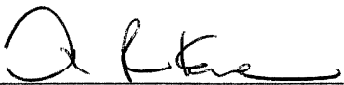

benefits provided for by the Uniform Act are extended to those affected by the federal and federal-aid programs,

- ▶ Provide mutual assistance in areas of education and training to increase the effectiveness and efficiency of the technologies available to meet present and future transportation needs,
- ▶ Serve the needs of our mutual customers by providing the best possible training and trained employees, in a cost-effective manner, and,
- ▶ Build on our years of cooperative efforts that have included extensive FHWA participation in IRWA committees, meetings, and conferences. These efforts and activities have included FHWA participation in many IRWA Education Seminars and meetings at the National and local Chapter level; active participation at annual meetings as speakers; vital presence and interaction with IRWA members through exhibits at annual meetings and specialty conferences; and the utilization of LTAP technology transfer centers to promote training activities

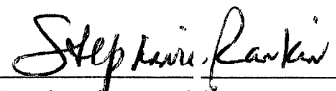

Joint activities will be determined on a calendar year basis. Annually, the Executive Director from the Federal Highway Administration and a representative of the International Right of Way Association will meet to evaluate training accomplishments of the previous year and to establish priorities for joint training activities in the upcoming year.
